-  **Semen Analysis with a Telehealth Results Review**  
Includes an at-home semen analysis kit, a result review telehealth appointment with a male fertility specialist, fertility 101 education, and lifestyle and behavior recommendations to improve the chance of conception.
-  **Male Fertility Workup**  
For males who've already had an abnormal semen analysis. The workup includes a 45-minute telehealth consult with male fertility expert, a physical exam, additional diagnostics (if needed), and a treatment plan.
-  **Vasectomy**  
If you're done having children, a vasectomy is the most effective method of male birth control.
-  **Vasectomy Reversal**  
For those who have had a vasectomy and wish to have another child, a vasectomy reversal may be a good option.
-  **Low Testosterone**  
Do you have fatigue, decreased libido, erectile dysfunction, weight gain or moodiness? You may be a candidate for hormone management.
-  **Sexual Health**  
For males who want to manage their sexual wellness and optimize their performance.
